

## HW-300 Excavator

The HW-300 excavator is the "fuel-saving star" among 30-ton equipment. And the power is strong, and the excavation work is solid and powerful. It is widely used in various small mines and large municipal projects, and is the mainstream product in the small mine market. The design concept of "driver-centered" minimizes the noise and vibration inside the cab; at the same time, it has an air conditioning system that meets the needs of operations in four seasons, and a multi-function LCD instrument panel to enhance operating comfort and convenience.

## Product Highlights

The use of high-quality 16Mn steel and welding technology are in line with international standards, which greatly increase the structural strength and ensure the safety of driving and construction.

The polishing treatment of the whole vehicle enhances the adhesion of the paint, delays the corrosion of the components and improves the life of the components.

The radiator is an aluminum plate multi-fin radiator. The vacuum brazing process is used to promote turbulence, improve the heat transfer coefficient, and have low hydraulic flow resistance. It can be manipulated even in hot summer days.

## Product parameters

Model	HW-300
Total weight(kg)	29500
Working device mode	Backhoe
Bucket capacity(m <sup>3</sup> )	1.4
Rated power(Kw)	168
Dimensions(LxWxG)(mm)	10055*3200*3697
Max digging radius(mm)	10175
Max.digging depth(mm)	4742
Max.digging height(mm)	9705
Max.dumping height(mm)	7024
