

HW-400 Excavator

The HW-400 excavator is equipped with a large bucket of 1.9m³, which effectively ensures operation efficiency and superior combined operation capability. Accurate and efficient compound operation has strong digging force, walking traction, lifting force setting effectively improves work efficiency, and reasonable oil ration setting ensures a more gentle compound operation.

Product parameters

| | |
|----------------------------------|-----------------|
| Model | HW-400 |
| Total weight(kg) | 37800 |
| Working device mode | Backhoe |
| Bucket capacity(m ³) | 1.9 |
| Rated power(Kw) | 214 |
| Dimensions(LxWxG)(mm) | 11380*3350*3697 |
| Max digging radius(mm) | 10635 |
| Max.digging depth(mm) | 3810 |
| Max.digging height(mm) | 10100 |
| Max.dumping height(mm) | 7180 |

Product Highlights

1. In terms of rotation speed and controllability, it has the same level of excellent rotation torque, which makes the rotation stronger and effectively ensures the efficiency of compound operations. The exquisite slewing motor significantly reduces the slewing swing and provides a stronger slewing torque, thereby realizing efficient work performance
2. Designed with instantaneous pressurization function, through the handle pressurization button, instantaneously increase the boom ascent speed or increase the walking traction to deal with complex working conditions.
